the gardtec **800** series of control panels

In choosing one of the control panels within the Gardtec 800 series you are guaranteed one of the most powerful, flexible, reliable and advanced units available. Whatever the application it will provide the perfect answer to your security requirements whilst allowing the user complete control with simplistic operation.

The Gardtec 800 series provides functionality, features and capacity more than sufficient to cater for any size installation. The series has undergone a recent upgrade to ensure that it remains ahead of the field and continues to provide complete protection with advanced user flexibility.

FEATURES

8/16 fully programmable zones expandable to 16/32 on the 816, enables flexibility to protect the environment in most domestic and commercial/industrial premises

2 superior attractive remote keypad design options, both available in LED and LCD

Up to 4 keypads per system for complete system control

On board keypad option with Personal Attack activation available through all keypads

LCD display gives 32 characters for simple operation and descriptions

1 full set and 3 part sets, including silent set options to cover any specific user requirement

Each part group has separate programmable setting mode and exit time if required

The control panel is Ace compatible for the simplest form of setting via an infra red keyfob

Zones may be removed individually if required

Chime function that can be turned On or Off by the User

Has the ability to connect directly to communicators to allow for the remote monitoring of the system

Up to 7 different user codes for numerous system users, Master User can add or delete these as and when required

Keypad is backlit for easy night time operation

Full system can be tested by the Master User for complete peace of mind

Bell ring times and number of activations are programmable by your installer

250 (800) / 324 (816) event log complies with most insurance stipulations

Zone descriptors and user names (816/840) for identity and simplified operation

Upload/Download compatible, enables remote interrogation and diagnostics by your engineer, for immediate service response

Gardtec 840 Additional Features:

376 event log

Up to 8 remote keypads per system

System can be split into separate areas if required

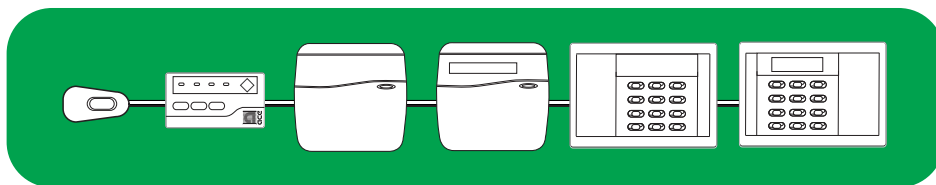

Up to 80 zones

47 user codes

ACE OPTIONS

Gardtec ACE (Advanced Control Equipment) is compatible with all of the Gardiner Technology control panel range. This allows for the simplest form of security system operation - the press of a button. This is achieved through an attractive keyfob and secure infra red transmission.

ACE utilises the highest form of security and with up to 14 keyfobs per system it's ideal for commercial and domestic premises.

The Gardtec 800 Series of control panels is able to offer you complete and total system flexibility.

The Gardtec 800 is the premier control panel in the market, with unbeatable features, build quality and reliability. The series offers both LCD and LED type keypads. The LCD type offers a full 32 character display for full descriptive operation. Display types can be mixed on the same system. The remote operation features really do take this control panel into a league of its own with the software already nominated for the leading international awards.

APPLICATION

With the option of up to 80 zones and a range of features second to none the Gardtec 800 series is more than capable in securing all domestic, industrial and commercial premises. The units themselves also come in either polycarbonate or metal for increased flexibility. The Upload/Download compatibility also make this ideal partner for systems requiring remote communications and interrogation.

AESTHETICS

A choice of keypad designs, providing robust and attractive alternatives yet offering simple operation means that the system can blend in the environment whilst providing full functionality.
